REQUEST INFORMATION

APPLY NOW

Stevens is traversing new frontiers in artificial intelligence by offering one of the first graduate programs in the US to explore AI applications for engineering.

In the applied artificial intelligence master's program, you'll develop a strong background in the theoretical foundations and algorithm development in artificial intelligence and deep learning with a thorough understanding of a variety of AI engineering applications. You'll gain a blend of software and hardware skills that are applicable across multiple engineering domains.

In the applied AI master's program, you are immersed in a hands-on approach to learning within a mix of course offerings, from fundamental core courses to state-of-the-art topics such as internet of things (IoT), information systems security, and big data applications.

You'll have the opportunity to work on exciting new projects and applications relating to machine learning, deep learning, image processing and computer vision, autonomous robotics, smart health, biomedical engineering, transportation engineering, financial engineering, embedded systems, software engineering and intelligent communications networks.

Concentrations

- Artificial Intelligence in Design and Construction
- Biomedical Engineering
- Computer Engineering
- Data Engineering
- Electrical Engineering
- Mechanical Engineering
- Software Engineering
- Systems Biology

The applied artificial intelligence master's program at Stevens is available on campus or fully online. Visit the link below to learn more about and apply to the online program.

The Stevens Advantage: Widen Your Engineering Career Options

With a [projected shortage of engineers through 2030](https://www.bcg.com/publications/2023/addressing-the-engineering-talent-shortage) (<https://www.bcg.com/publications/2023/addressing-the-engineering-talent-shortage>), now is the time to get your engineering degree. But to compete in today's career climate, graduates must adapt to rapidly-evolving technologies impacting all corners of the job market, like generative AI. At Stevens, you'll learn the in-demand skills you need to fill the talent gap. Our core curriculum – infused with artificial intelligence electives and hands-on education opportunities – develops the deep expertise, critical thinking, interdisciplinary collaboration, and entrepreneurial savvy required to thrive in a technologically disrupted marketplace.

One of the country's premier institutions for computer engineering, signal processing and emerging communications standards, Stevens is located just across the river from New York City and an ideal place for students who want to network with tech companies who are developing groundbreaking new technologies and looking to recruit top level talent.

Learn more about what makes an engineering education from Stevens a unique experience:

- **Core AI Curriculum** (<https://www.stevens.edu/school-engineering-science/graduate-studies/programs#ai-curriculum>): To help build the next iteration of an AI-competent workforce, our standard graduate curricula is infused with core and elective artificial intelligence courses.
- **Graduate Cooperative Education Program** (<https://www.stevens.edu/school-engineering-science/graduate-studies/co-op>): Available with two tracks, your co-op experience can serve as a starting point for a research project or augment your on-campus research with complimentary experience.
- **International Student Experience** (<https://www.stevens.edu/school-engineering-science/graduate-studies/international-students>): Tap into our expanding worldwide network of research, academic and alumni partners and mentor with our expert faculty in a number of federally-designated STEM degree

programs. Optional Practical Training (OPT) or Curricular Practical Training (CPT) is available (<https://www.stevens.edu/off-campus-employment-0>) to gain work experience in your major/field of study.

- **State-of-the-Art Research Labs and Facilities** (<https://www.stevens.edu/school-engineering-science/research/centers-facilities>): Build, tinker and test your designs in Stevens' MakerCenter, Prototype and Object Fabrication Lab, or numerous other research facilities.
- **Research Opportunities** (<https://www.stevens.edu/school-engineering-science/research>): Renowned faculty, labs and research centers – as well as industry partnerships and funding from leading national agencies – support strategic and interdisciplinary research in engineering and science.

A.I. and Machine Learning Master's Programs at Stevens Institute of Techn...

The applied artificial intelligence master's program is available fully online and is a Top 25 Online Graduate Engineering program by US News and World Report.

More opportunities for Stevens graduate students include:

- **Wide selection of Graduate Certificates** (</school-engineering-science/graduate-studies/certificates>)
- **Student Organizations** (</student-life/graduate-student-life>)
- Optional research or clinical thesis
- Credit for on-the-job projects with your current employer
- Extensive hands-on laboratory experience

- Research with clinical collaborators

AI Graduate Programs That **Advance Your Engineering Career**

The applied artificial intelligence master's program develops in-demand knowledge and skills to put you on track for career success in a variety of roles like:

- Artificial Intelligence Engineer
- Machine Learning Engineer
- Data Scientist
- Data Engineer
- R&D Engineer
- Analyst Engineer for Intelligent Networks

Our graduates have been hired at: AT&T, Comcast, Facebook, Goldman Sachs, Google, Microsoft

A Tech Forward Education

The educational experience in our applied AI program is designed to imbue you with the mindset and skills you need to stay relevant in a rapidly-evolving technological and professional landscape.

FACULTY MENTORSHIP

CAMPUS & COMMUNITY

INTERNSHIPS & ASSISTANTSHIPS 

My favorite part about Stevens has been interaction with faculty. During my first week, I was off projects with him, some of which are a highlight of my resume. I was also very impressed with t when interacting with students.

Master's Programs Related to Artificial Intelligence

Electrical Engineering Master's Program (/program/electrical-engineering-masters)

Become the architect of the next-generation of electronic devices that will shape the future of society.

Computer Engineering Master's Program (/program/computer-engineering-masters)

Become a sought-after computer engineering expert with cutting-edge knowledge and strong professional connections.

Machine Learning Master's Program (/program/machine-learning-masters)

Get on the fast track to make an impact in one of today's fastest growing fields with a machine learning master's degree.

Masters in Computer Science (/program/computer-science-masters)

Earn one of the most desirable degrees by drilling down to what interests you most.
