Earn one of the most desirable degrees by drilling down to what interests you most.

Our highly customizable computer science master's program provides advanced, sophisticated training for both professional and academic career tracks.

The computer science master's program at Stevens is designed to meet growing demand for skilled professionals in the development and application of information technology. The program provides a solid foundation in theoretical instruction along with practical applications necessary for industry success.

Available on campus or fully online through the award-winning Stevens Online, our unique, advanced courses in enterprise and cloud computing, artificial intelligence, machine learning, and secure systems will give you a competitive edge in your career.

Throughout this program, our expert faculty will teach you how to effectively and professionally communicate computer science concepts, designs and solutions in your every-day work environment. You will also learn special skills in key application domain areas of computer science, including how to implement the solution of a computing problem using the appropriate program languages.

Areas of Focus

- Cloud Computing Databases
- Software Development
- Visual Computing and Information Extraction
- Secure Systems
- Gaming and Simulation
- Mobile Systems
- Modeling, Simulation and Visualization
- Network and Systems Administration
- Web Application Development
- Machine Learning

The computer science master's program at Stevens is available on campus or fully online. Visit the link below to learn more about and apply to the online program.

The Stevens Advantage: Widen Your Career Options

To compete in today's career climate, graduates must adapt to rapidly-evolving technologies impacting all corners of the job market, like generative AI. At Stevens, you'll learn the in-demand skills you need to fill the talent gap. Our core curriculum – infused with AI electives and hands-on education opportunities – develops the deep expertise, critical thinking, interdisciplinary collaboration, and entrepreneurial savvy required to thrive in a technologically disrupted marketplace.

Our campus is located just 15 minutes from downtown Manhattan where corporate headquarters and a large tech startup community are constantly looking for top talent. This convenient location provides you with networking opportunities not available anywhere else in the country.

Learn more about what makes graduate education from Stevens a unique experience:

- **Core AI Curriculum** (<https://www.stevens.edu/school-engineering-science/graduate-studies/programs#ai-curriculum>): To help build the next iteration of an AI-competent workforce, our standard graduate curricula is infused with core and elective artificial intelligence courses.
- **Graduate Cooperative Education Program** (<https://www.stevens.edu/school-engineering-science/graduate-studies/co-op>): Available with two tracks, your co-op experience can serve as a starting point for a research project or augment your on-campus research with complimentary experience.
- **International Student Experience** (<https://www.stevens.edu/school-engineering-science/graduate-studies/international-students>): Tap into our expanding worldwide network of research, academic and alumni partners and mentor with our expert faculty in a number of federally-designated STEM degree programs. Optional Practical Training (OPT) or Curricular Practical Training (CPT) is available (<https://www.stevens.edu/off-campus-employment-0>) to gain work experience in your major/field of study.
- **State-of-the-Art Research Labs and Facilities** (<https://www.stevens.edu/school-engineering-science/research/centers-facilities>): Build, tinker and test your designs in Stevens' MakerCenter, Prototype and Object Fabrication Lab, or numerous other research facilities.
- **Research Opportunities** (<https://www.stevens.edu/school-engineering-science/research>): Renowned faculty, labs and research centers – as well as industry partnerships and funding from leading national agencies – support strategic and interdisciplinary research in engineering and science.

AI, Machine Learning, Data Science, and Robotics Research at the School ...

Stevens graduate students have the opportunity to learn from leading experts in AI and machine learning research, and their applications in data science and robotics.

More

opportunities for Stevens graduate students include:

- **Wide selection of Graduate Certificates** (</school-engineering-science/graduate-studies/certificates>)
- **Student Organizations** (</student-life/graduate-student-life>)
- Optional research or clinical thesis
- Credit for on-the-job projects with your current employer
- Extensive hands-on laboratory experience
- Research with clinical collaborators

Graduate Programs That **Advance Your Career**

The

computer science master's program develops in-demand knowledge and skills to put you on track for career success in a variety of roles like:

- Computer Systems Analyst
- Programmer
- Database Administrator
- Software Developer
- Software Quality Assurance Tester
- Web Developer
- Software Engineer

Our graduates have been hired at: Amazon, Bloomberg, Facebook, Google, IBM, Intel

A Tech Forward Education

The educational experience in our programs is designed to imbue you with the mindset, skills,

and abilities you need to stay relevant in a rapidly-evolving technological and professional landscape.
